APAC SCAFFOLD

ABOU

Founded in 2004, APAC scaffold specializes in supplying of system scaffolding & falseworks.

The company has always strived to set and maintain the very highest of standard in safety and the supply of the highest quality formwork and scaffolding components.

Our key products:Ringlock scaffolding system, Cuplock scaffolding system, Aluminum scaffolding system, Shoring props and Formwork Products.Focus on the technical development and to meet the needs of our customers we adopt a lot of new technology and inspirational ideas to our products.

Our scaffoldings which are widely used in residential, shipbuilding, mining, insulation, oil & petroleum, airports, bridges etc.

OVERVIEW

APAC'S Capabilities

[EXPERTISE]

Between most our team members we have decades of experience in the industry. Many sales are mechanical background, can better understand the customer's project needs, in our view, this is very important in international trade, is conducive to less customer communication costs.

In dealing with us, you have the benefit of dealing with an experienced,professional, and motivated team who's committed to attention to detail, working to a budget, a timeline and qualified products.

[PRODUCTIVITY]

APAC Scaffold is a professional construction material supplier, producing various equipment for construction industry, such as Aluminium scaffolding, ringlock scaffolding, shoring prop, and related accessories.

We operate professional production workshops and equipment, including punching machines, welding machines, pipe cutting machines, shearing machines, bending machines, screw machines etc. After years of hard work, we can produce up to 30,000 tons of equipments annually and our products are sold in many countries.

[QUALITY ASSURANCE]

We have established a quality assurance department to make sure that our products meet customer requirements. Based on the ISO9001 Quality Management System, our professional team strictly examines every procedure, from supplier verification to examination of raw materials, production, and finished products, to ensure the high quality of products.

We fully understand the scaffolding standard such as

EN12811,EN12810,AS/NZS1576.2, ANSI/SSFI SC100-5/05, NCH2501, GOST 27321-2018 and GOST 24258-88 for different countries.

KEY

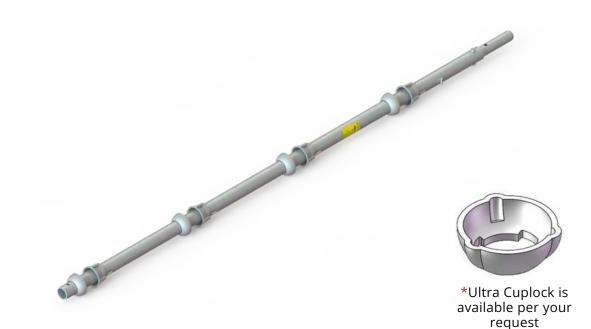

Spigotted Standards

CUPLOK spigotted Standards are principally used in access scaffolding applications and also as a base structure for formwork support applications. They have cup joints at 500mm intervals. The captive mobile top cups are designed to endure rough site handling and welded bottom cups are made from high quality steel.

ltem No.	Description	Height \	Weight	Weight Packa

Cuplock Ledgers

The CUPLOK Ledgers are manufactured from 48.3 mm O.D. tube with forged steel blade ends which locate into bottom cups of the Standards and are locked in place by the the corresponding top cups. Ledgers are available in various lengths to provide the desired grid dimension for scaffolding or formwork.

Cuplock Transom

CUPLOK Transoms are fabricated from twin structural angles fixed back to back with a drop forged blade attached to each end. The 2.44m Transom has an additional web member welded below the flange section for added strength. The transom blade locates into a bottom cup and is locked in position by the top cup.
